

Name: _____

Date: _____

Quiz name: Q11_CP

1. Cerebral palsy can occur due to

- (A) lack of oxygen to the brain
 - (B) genetic mutations
 - (C) inflammatory infections
 - (D) stroke
 - (E) all of the above
-

2. Of the more than 64 interventions used to treat cerebral palsy only

- (A) 58% are clearly advisable
 - (B) 16% are clearly advisable
 - (C) 20% were clearly unadvisable
 - (D) A and C
 - (E) B and C
-

3. iNOS

- (A) is an enzyme
 - (B) produces nitric oxide
 - (C) produces nitrous oxide
 - (D) maintains vasoconstriction
 - (E) A and B
-

4. BoTox (botulinum toxin)

- (A) is a protease
 - (B) cleaves SNAREs
 - (C) is one of the most effective treatments for Cerebral Palsy
 - (D) is one of the least effective treatments for Cerebral Palsy
 - (E) A, B and C
-

5. Linkage disequilibrium describes

- (A) The correlation between genetic mutations
- (B) The lack of correlation between genetic mutations
- (C) The natural variation in genetic sequence
- (D) The tendency of genetic mutations to come to equilibrium within a population
- (E) the non random occurrence of genetic markers within a population
