

Q6_Asperg

1. Asperger's is considered to be a ASD spectrum disorder and symptoms can be treated with

- A risperidone
- B sertraline
- C ziprasidone
- D quetiapine
- E All of the above
- F None of the above

2. Asperger's is a form of ASD where the patient demonstrates high intelligence compared to other ASD patients

- A True
- B False

3. The corticospinal tracts originate from the

- A Parietal lobe
- B Hippocampus
- C Frontal lobe
- D All of the above
- E None of the above

4. Magnetic field stimulation of the brain occurs because

- A Iron particles rearrange to activate neurons
- B Magnetic receptors in the brain create an action potential
- C They create nuclear alignment as in an NMR
- D The magnetic field creates an electric field across neuronal membranes

5. Theta burst stimulation is the repetition of high-frequency stimulation repeated at the theta wave frequency of

- A 100 Hz
- B between 5 and 7 Hz
- C between 10 and 20 MHz
- D 50 Hz
- E 5000 Hz
